

MACOMB COUNTY CTE ADVISORY MEETING

OCTOBER 27, 2010

Macomb Intermediate School District

The following are all comments collected from the Evaluation Forms turned in at the end of the Regional Advisory Meeting.

We will use your comments to better plan our next event on October 19, 2011.

Thank you for participating. That is what makes all of our CTE programs the very best.

I came expecting...

Talking about most up to date Technology.

Talking about tech classes and what is needed to improve.

More on my field related to the programs that I teach and how to improve it to stay with industry.

More focus on topic not Green Jobs.

The routine discussion format.

The same questions for discussion.

To share business needs from the educational system.

Helping shape education in the MISD.

Recommendations on modifying my curriculum to better prepare my students for the harsh reality of the business world waiting for them.

I got...

Lessons on Green Technology.

Green tech in workplace and to teach.

Not much.

Much more interesting discussion regarding Industry, societal, and cultural issues

New questions !!

Interesting perspectives.

Useless questions – Renewable Energy ?
Are you kidding me ?

What has renewable energy have to do with software design and preparation for the IT world?

To learn from my peers.

To enhance my curriculum structure.

Valuable information for Graphic Design.

Standardized questions.

To discuss issues related to the economy and it's effects on classes we teach.

To network a lot.

A great conversation with fellow teachers.

Boredom

A CTE meeting.

What employees are looking for.

Good discussion about CTE programs.

To discuss with business professionals the changing economy.

No expectations.

Info from business.

To work together.

Good Discussion.

To hopefully get some ideas.

Knowing that issues would be presented which would involve teachers, business partners.

To learn what's new and up and coming.

This green stuff is a fad that has damaged what should have been a constructive discussion.

A good discussion on what is important.

A glimpse at the prerequisites for college success.

Good ideas.

Very nice free form discussion. Great contacts.

A few issues were discussed.

Networking a little.

Always informative.

Excitement

Too much varying discussion.

Communication, Technical Writing, and Math Skills.

Relationships and ideas from teachers and business resources.

Topics to focus on within my curriculum for business classes.

Good ideas. Interesting Topics.

A bit of info.

Ideas, connections and names.

A lot of info.

Great Discussion.

More than I was expecting.

Teaching ideas of objective from business people.

Information about what should be taught to suggestions from the business partners ideas about hospital tours.

Information on going green.

Sharing of ideas & information.

To talk to business partners about how our programs could be improved to meet their needs.

I wasn't sure what to expect since I am a first year teacher & this was my first advisory committee meeting.

Current trends.

I wasn't sure what to expect. A lot of valuable information about

To learn about the Career Tech world.

Curriculum sharing updates on State Curriculum.

To hear others ideas & suggestions.

A small group discussion about jobs.

I really didn't have any expectations. This is my first meeting.

Nothing – this was my first experience – So a learning experience.

Small group discussions.

A smaller breakout session with strictly 1 particular field.

Good ideas.

Presentation from educators on their needs for students & what we can do.

Smaller groups – an inspiring key note speaker.

Not as much of a discussion.

That.

Current Trends – What other schools are doing – What business partners can offer us.

**- resources
- programs to look at
- new ideas**

A lot more.

job shadowing and other opportunities.

A lot of medical information and how people care for the next generation.

I got a lot of info on different available resources for possible experiences for the kids that are career created.

Sharing.

What I expected.

More knowledge on how school are trying to get students in to observing.

An idea of the difficulties teachers have in helping the students.

Large group discussions that were great for idea sharing and networking.

A large group with all health care professionals.

Lots of ideas for classroom curriculum.

**- a nice dinner
- good conversation
- networking**

A big discussion and a lot of new knowledge how students like the experience of the health care setting.

To share from the business side.

Honestly a boring meeting.

Information on future plans for all CTE programs.

Guidance for my child's future – on the job training.

To be able to network with my colleagues.

To meet other health care professionals.

Small group discussions.

I did not know what to expect - 1st time.

I didn't know what to expect, but I was pleasantly surprised.

To network.

Dinner & questions being asked to me.

New information on how to merge Child Care and Teacher Cadet.

Interaction with peers.

Sharing of information.

To learn ore about each district.

?

Networking

Lots of unknowns about what State & Local District is doing w/programs.

To be very overwhelmed.

Teacher input.

Great information.

To share.

A meeting in which one district helped another in giving suggestions and tips of how to better students' education and learn better techniques.

A lot of information on medical job shadowing.

Lots of ideas on how to get them ore info (the kids) on the field they're interested.

Not enough time to network – we have such a large group ! Better questions.

Great info on other programs.

Large group – but this worked well !

A lot of wonderful resources. Met plethora of colleagues.

Great ideas.

Bored.

Some good insights.

Interaction with peers.

Great input.

We are still in the planning stages.

Shared info from other teachers.

Great connections.

Angry

A lot of new information & ideas.

An understanding of teachers' frustrations.

To gain useful information in my classroom.	A bunch of info about students not learning math.
Nothing.	A lot of info.
Not a lot of progress.	A very effective meeting sharing ideas and concerns common to each other.
Talk about curriculum.	People should share lesson plans at some sessions.
Honestly, first meeting... I had no expectations... Wasn't really sure of what it was.	The chance to meet others in the field, other schools, etc.
Unknown.	More skills needed.
The unexpected.	Problem solving skills.
The same usual mtg.	Meeting that was more organized.
Ideas for new teaching and finding resources for my day to day curriculum.	Information on... podcasts, Navigator. Khanacademy, on-link textbooks... Great announcements for me to incorporate to my classroom.
Meet other performing arts people.	None.
A forum of CTE teachers in my concentration only.	To discuss other areas of media & graphics and more business people.
General information as I am developing a program for my school.	Many good contacts and ideas.
First time here, expectations were open.	Great information.
Learn about your program and find how to improve the high school's theater program and what help is available to it.	
To learn more about the direction my classroom should be focused in relation to industry.	Much of what I expected.
My same stuff from last year.	Info from other people in other fields.
<ul style="list-style-type: none"> • Tips • Arguments • Curriculum Issues 	To meet industry people.
To acquire knowledge of various schools in our district and their various programs.	Many excellent tips and ideas to bring back to work.
More info / discussion related to furniture &	

cabinetry.	
What I heard.	Understanding of future thinking.
Program review.	State Curriculum proposal / mandate.
First time so did not know what to expect.	Good insight into the problems with the course and possible ways to correct it.
Program review & new mandates from the State. Little.	Good discussion about “Green Building”. A lot.
Nothing preconceived.	Great input from participants.
To meet industry professionals.	Information and input about Construction Standards. Stick with the basics – leave out Heavy Construction.
Learn more about building technology.	What I came for.
More input from industry leaders.	To meet and hear interesting points on CTE in Michigan.
Good company – Good food. News from State.	More info than I know what to do with.
To hear about construction issues & teaching issues.	That and some more.
Hear new concerns from the State.	Frustrated with State mandates.
Unknown.	Better understanding.
Good if not excellent feedback.	More affirming knowledge that the
To meet new teachers.	A lot of new ideas.
To update myself about the area.	Lots of info.
A large speech and a lecture.	A lot of information and a fun and interesting group project.
Not sure.	Info on similar programs in the county.
Communication.	Communication.
Connections with others.	Plans for next meeting.
Hearing what is going on in other schools.	A lot of information that I plan on looking into.
To learn.	A better understanding.
Knowledge.	Knowledge.

A good meal and a good conversation.

To give input on architecture design drafting.

To contribute.

Meetings.

To meet some interesting people.

?

To learn ways Ok helping the schools.

Not sure.

We have been talking about and have about the same things for 20 years and have never seen any of it go to completion.

Info to use to make my class better.

To help my kid's school.

To talk about issues.

To be helpful.

Industry input.

To complete a questionnaire about CTE and to be informed of other CTE procedures.

That there were only going to be teachers, but there were also business owners.

A different type of speaker - more educational.

To hear current issues in my area.

More questions in the breakout session for Teachers, parents & students.

To hear potential technological opportunities

A Great meal and Great conversation.

Ideas on future trends in CADD

Good & useful information for MCC.

Ideas about running a shop.

To meet some good people.

Comfortable feeling that I am not alone in my feelings about changes.

Many ideas and plans to help.

A lot – same things going on in other H.S.

Discussions on problems happening in schools and solutions we are trying to come up with.

Lots of ideas.

An insight of how hard it is to teach the kids of today.

Good group interaction.

To talk.

Overwhelmed by the facts and issues presented to me.

State requirements for planned test.

Valuable info to bring back to my fellow CTE instructors at my school.

To express my thoughts with others and get our students point of view.

A lot of information of how the state controls the schools.

Some of that.

A better understanding about how Baker College is trying to go green.

Strong support for my focus in teaching the

And shortcomings in the kids or my program.	fundamentals of communication, initiative and basic presentation skills.
More questions – more CTE information.	Not much information.
To gain information & knowledge in this session.	Information that I will take back to some of my employees & clients.
To go over curriculum and state CTE updates.	
To increase my awareness of CTE issues.	Thought the initial talking points were not strongly related to this group.
?	Various views from different schools & industry.
To fulfill the state requirement.	A student's opinion was appreciated. Industry input.
Good dialogue on business / education.	Great dialogue and learning the dilemmas on both sides.
Nothing.	A perspective of how schools think of marketing.
?	ideas.
To give input on what businesses are thinking.	
Gain updated knowledge in Marketing.	Info on renewable energy.
To hear about the issues of business students in the marketplace.	
Good information from industry partner.	Food input from industry and students.
Various inputs in regards to today's business world.	A look into how other industries apply technology.
More rushed / surface discussion.	Insight / connection about problems in different districts.
What we did.	What I needed.
To learn more about school system.	Great discussion and more of things needed to succeed.
I really wasn't sure what to expect as this was new to me.	A general understanding of how schools and businesses are trying to pave the way for the future.
Unsure.	A good insight to what business & colleges are doing.
To help from a business prospective.	To help.

Understanding the state of electronics & Mechatronics in the county.

What I was expecting.

What happened.

Broader knowledge of articulations agreements.

A vision of the future for my particular programs in the grand scheme.

First time to attend. Came without expectations.

A real snapshot of the issues facing technical teachers & their quest for developing our youth.

Dinner & development.

What I was looking for & a jump drive.

THE MOST VALUABLE PART OF THIS SESSION WAS:

Talking of Green Technology.

Talking about the new green technology.

Discussions among the teachers.

Listening to business & post secondary input.

Meeting high school faculty.

Discussing real issues in education and industry demands.

The information that was shared.

Conversation between the teachers of I>T> was very interesting. The questions did not have a lot to do with it.

General discussion on current events.

Intelligent discussion with business professionals who are witnessing the technology trends first hand.

Discussion.

The need for communication skills.

Meeting new people.

Technology.

Talk about technology and online learning.

Discussion on the benefit of reducing paper vs. increasing technology for the students.

The breakout sessions.

Networking.

Breakout – discussion on technology.

Talking and sharing with fellow content area teachers.

Collaboration.

Dinner.

Great ideas from group.

Collaborating with other educators though out the county.

Breakout sessions.

Learning about various CTE programs.

Collaboration.

Meeting with education in this.

Interaction / Ideas from others in the same area.

Business partners.

Breakouts.

**Being able to visit with other teachers, students and parents and college people too.
Lots of great ideas.**

Collaboration with teachers & business partners. Dinner was also EXCELLENT ! Thanks !

Brainstorming ideas from representatives of business.

Promoting our Saturday Series.

Being able to hear the business partner's opinions and suggestions.

The breakout session. The discussion was wonderful. Networking with others in the health field.

Networking dinner.

Interactive discussion among participants.

Info about various opportunities to tour/job shadow area hospitals and colleges/universities.

Group discussion.

Listening to the comments and advice given by those in the sessions.

During the breakout session, I was able to listen to others from schools and health careers talk about opportunities that are available to me.

Listen to the professional people in our room, their knowledge, information and ideas.

Hearing available opportunities for the kids at nearby hospitals/colleges. Also for job shadowing or college prep.

The breakout session are a great opportunity for networking & sharing school to school.

Meeting other instructors, hearing what others are doing with their curriculums.

Discussing what opportunities a high school student will have.

Breakout session.

All the information that can be applied.

Networking.

Learning the ups and downs the students go through to see what career they may want.

Hear the concerns of the community and educators in trying to provide opportunities for the Health Odd. Students.

All the great ideas.

Discussion & ideas.

Marie Vanhuysse & her love of students.

Everything about our students getting a experience in a real health setting.

Excellent to hear multiple opinions from medical professionals throughout the area.

Medical breakout session.

Learning the everyday problems everyone in health care has with job shadowing and how to better prepare high school students like myself.

Networking.

All of the conversation about externships for students.

Listening to the professionals tell you what goes on behind the scenes to prepare for the medical field.

Ideas from everyone.

Listening to all of the other schools / hospitals / health professionals talk about their programs.

The great discussion from all of the members present.

Networking.

Being in the company of different health professionals / health care professionals.

Networking with other CTE teachers and others from industry.

Great discussions.

Getting my point across about the dress code in the preschool. Exchanging ideas.

Getting together to discuss common issues.

General discussion.

Breakout session. Dinner.

The ideas and input of all attending. Great input.

The discussions.

Breaktime & food.

Meeting with other Teacher Cadet teachers.

Exchanging ideas.

Breakout sessions, I was able to go to 2 since I teach hospitality & child care.

Listening to other teachers / parents / students.

Teacher input.

Common goals.

Getting together with the gang.

Sharing the same concerns and problems.

Not sure.

“Going Green” ideas - validation of reinforcing basic math skills to students.

More math.

Taking responsibility and action.

Sharing of mutual knowledge.

To me it was the collective sharing. Listening to other culinary instructors insights. Ideas, problem solving techniques and even frustrations help encourage me to find new ways to constructively re-developing my teaching techniques and curriculum.

Until there is more involvement by other performing arts programs, this program does not really address any of my needs or interests.

The breakout session discussions.

Meeting people in education and industry in the field that I will be teaching.

Discussion between the other professionals in the area I teach.

The breakout session and talking with other Web teachers.

Discussing industry standards and trends with my advisory board member.

Getting info from other teachers.

Open communication.

Discussions with numerous areas of graphics, digital media.

Listening to professionals in the trade voice their opinion.

The interesting topics conversed.

Breakout.

Finding out about the standards being used which seem out of line.

Round table discussion.

Breakout sessions.

Hearing from other professionals.

Industry reaction to new construction standards and lack of activity in green and sustainable work.

Meeting other participants.

Dialogue - conversation exchange.

The discussion by all members in this meeting.

Learning about becoming more green.

Breakout session - New technical standards.

Connecting with other teachers and contractors about issues in the building industry.

Hearing and brainstorming with industry.

Sharing ideas.

New segments.

Our networking and communicating of the new curriculum.

Intercommunication.

Linking with other schools and sharing ideas for the programs.

Networking with others in the field.

The breakdown.

Meeting in our breakout session.

Talking with other EMT teachers.

Speaking with other professionals in the field.

Networking.

Networking with other professionals.

Networking.

The guest speaker.

The input from industry partners.

Open discussion with other teachers and people in the industry.

Green technology and renewable resources.

Hearing other perspectives.

Seeing what is going on with other programs / teams.

Learning about curriculum.

Discussion with business and Macomb Community College personal.

Talking in our groups !

Hearing links between high school and college curriculum.

Sharing what is important for H.S. students to learn.

Learning how much of a pain rules & regulations are.

Interaction among committee members. Identified common problems and ideas.

Green Technology

Talking with people in the area.

Learning that there are changes made around the district.

Hearing the current challenges that the Tech programs face.

To hear the input from other teachers.

Talking with people from the area.

Discussing change and new technology.

To hear that other instructors have the same issues as we do.

The open discussion about the industry and their needs and wants.

How bad it has got in the high school.

Group discussion.

Talking with business leaders.

I learned that there isn't enough support for CTE from the State or the districts. I worry what we are preparing students for if it's not a career.

Fin / Mkt

Learning about upcoming mandates through colleagues.

The breakout session.

I was able to express my thoughts as a student and put the situation in the students point of view.

The breakout session.

Feedback from the business community members (Baker College and Extra Credit Union).

The breakout session.

The breakout sessions.

Everything.

Communication with others about the topics discussed.

Teachers sharing classroom ideas.

Open discussion.

Industry perspective.

The opportunity to interact with business representatives and other teachers.

Interaction of business & education and bridging the perceived gap.

Hearing about “industry” needs and how our students are measuring up.

The ability of being able to communicate my concerns.

Learning what other schools are doing.

Group discussion.

Group discussion.

Breakout session.

Learning what other schools are doing within their programs.

Breakout session.

Open-ended discussion at the end.

Hearing how others view today’s technological advantages / disadvantages.

Breakout session - open dialogue.

The interaction of professionals and the dinner too.

The breakout session and discussion.

The open discussion in terms of going green and trying to figure out how to move the industry.

Discussion with business partners.

Discussions.

Open discussion questions.

Breakout - Awesome discussion on articulation between high school courses and equivalent community college courses.

Being briefed on the latest manufacturing initiative around the state of Michigan related to renewable energy. Understanding the barriers schools face with developing curriculum.

Collaborative thoughts and ideas about the most current topics.

Breakout sessions.

I Plan To...

Learn more on it.

Learn more on such topics.

Keep in touch.

Revisit and analyze trends.

Share information with students.

Take ideas back to my business.

Continue on since there was nothing productive to take away from the topics given.

Work on communications and logic.

Try to start a blog.

Talk to administrators about the \$\$ and quality benefits of green technology.

Look at how I can plan a green session for interior design.

Have intervals in class.

Incorporate additional math and reading skills.

Incorporate business / technical writing.

Take information today back to my classroom.

Use some ideas to apply.

Attend / hold a joint advisory meeting.

Incorporate new ideas.

Go back to my colleagues in the county and ask for their support and involvement.

Use some of these ideas in my classroom.

Use some new ideas in my classroom. Get info on Co-op Tree Folders?

Get my students opportunities to job shadow, get hospital tours and try to get more guest speakers. Students need to make their own connections too... become proactive.

Talk to the students about thinking of ways to be more green.

Take information back to my colleagues who couldn't attend.

Take my students on a field trip to a health care facility or college.

Look more into websites and ideas that were suggested.

Current trends.

Look into job shadowing to further my knowledge of my future career.

Back my daughter's decision in her career choice.

Use my resources as a nurse to bring different speakers to the classroom.

Include more "green" into classroom.

Utilize ideas shared in my curriculum.

Come again.

Continue to work on learning opportunities at my place of employment for students.

Hopefully attend again.

Expand my job shadowing with contacts.

Attend next session. Continue to offer help with students.

See you next year.

Succeed in everything that I do and try my best.

Continue participating.

Take the information into consideration and use it to my advantage and help other students with the same problems.

Get more involved.

Get involved.

Implement some new ideas !

Help my Health Occupations teacher with contacts at my hospital.

Get more involved in community to gain more observships.

Trying to get more quest speakers in the classroom.

Become a teacher and use these methods I learned.

Turn all ideas into useful tools to merge the 2 courses.

Follow up on several items.

Move forward.

Use ideas.

See what to do next in our district.

Keep in contact with staff from other districts.

Contact Bonnie (LC Pankow). Get more updates regarding endorsement guidelines.

Parent my child and advise him to go into education and stay out of the politics.

Keep contact with people I met from other districts to work on new ideas.

Make connections with other teachers.

Help Clintondale H.S. with their program.

Keep my program strong.

Go green.

Use Navigator.

Incorporate more math to see if there is any level of progression with our students.

Incorporate more basic math skills. Look into new Prostart curriculum.

Execute more math.

Use technology more.

Slowly evolve my current program to utilize the new technology that my students more closely relate to and learn more effectively.

Keep running our program at C.H.S. as currently set up.

Continue to love my job.

Use all of the information that I received to start my program.

Connect more with other instructors & industry professionals.

Continue working with the drama department.

Make some changes to my present curriculum in response to tonight's conversations.

Start communicating with other teachers.

Take some info back to my program.

Network.

Get together with the other instructor in the group and get one on one.

Get more informed.

Be part of the process to re-establish prior standards.

Look into ways to help improve the course.

Discuss with co/workers.

Use info in local advisory.

Share info with students.

Keep changing with the times.

Re-tool.

Follow up with my community.

Work with MISD to change some state regulations.

Change new state requirements.

Use these ideas.

Update my program.

Further my education in this subject.

Keep in touch with peers form other programs.

Contact my network.

Follow up on some ideas I got during discussion.

Pass on the information.

Implement what we talked about into my curriculum.

Keep in touch.

Do e-mail all H.S. teachers periodically.

Go to class tomorrow.

Keep plugging along.

Keep on track with curriculum updating.

Get free tooling and training for New Haven High School.

Use a lot.

Pass this information on to help the education.

Find ways to use the ideas.

Change a couple of things. Update some things in shop.

Teach.

Do what I can to help make sure that CTE becomes more prevalent and an area of focus for our schools.

Inquire about the test.

Investigate exit exams further.

Take what I learned today and use it as knowledge to use for the future.

Use that in my lesson plans that apply to those issues.

Look for our questions to be answered and implemented.

Continue my focus.

Hopefully I will get more info at the business conference.

Return next year.

Continue asking how my district is responding to the needs as they change.

Take examples back to my classroom.

Use this input to help prepare kids.

Contact several other teachers to seek out more information about topics / comments made.

Utilize the information.

Continue to work with school system.

Unsure.

Become more involved with students (high school) at my facility.

Continue participating.

In the next session, I would like...

Learn more.

To see more green classes.

More discussion.

More focus on our fields.

More industry-focused discussion questions.

Keep the same format. It was very well organized.

List the items we need from I.T. graduates.

Better planning.

3 real world programmers - 2 IT Technicians - 1 Manager in a software field.

More to do with what I teach.

More relevant questions.

Work on connecting to all the teachers in the same area in Macomb and keeping connected.

An FCS facilitator and to oversee a teacher along.

Split up of groups into different rooms.... Don't necessarily need a facilitator.

Larger group.

Have the same group.

Smaller groups – better focused discussion.

Bring examples of projects to use in class related to business.

Project based ideas to integrate into curriculum.

To stay on topic.

No keynote. My second time here. Weakest component.

To hear more from colleges and business people on what projects we can work on with our students.

Hear more from the business partners about opportunities for our students.

Industry guest speaker.

To hear from the business partners about their needs. Smaller groups that encourage participation, like we had last spring.

Get contact information from teachers to get more ideas from.

To learn more about other health careers available.

To hear even more. These are very knowledgeable people !

Sharing from other teachers about how they are instructing and managing to get all objectives covered in 1 yr. programs. Plus *how the schools that have good test scores on state test are doing it.

Try to participate more.

Discuss plans for increasing student learning opportunities.

Breakdown into a smaller group.

Sharing of e-mails of health care workers.

One person not to monopolize group discussion.

I am a student, and I won't be at the next session.

Further discussion on job shadow placements.

To see the breakout sessions continue.

To hear results and improvements that have been made to help future health science students.

More volunteer work or job shadowing with any kind of private practice.

To find out about more opportunities (volunteer wise).

To see Macomb County ISD develop a Health Science speakers bureau.

To be more participative – 1st time only had a couple comments.

To have more ideas to say.

More input on where everyone is with the merge and combine final thoughts.

See the progress made.

More business representatives and students.

?

To be more active. This was my 1st advisory meeting as a new teacher.

More things accomplished. Better agenda.

See the green side of where culinary is going.

See what progression everyone has made with different ideas they implemented.

How to use Navigator - Actually I know, but others do not have the skills.

More sharing on tactical use to teach certain skills. ie. - Alternate example of using quarts measuring by cups.

?

Knowledge of peer teaching methods.

Do more of the same. "What is working for you"

Have at least one other person from the Theatre field.

To have a separate room for each group. Hard to hear.

To get more of the same.

Discussion about successful projects.

Start a blog among all the participants.

Talk more with industry. Have industry talk more to us.

To have all technology programs together. Design tech with digital multimedia.

Be invited.

Redefine standards.

To hear more input from teachers and business to help target ways to improve the kids trade education.

Refine MI Curriculum requirements.

Hear what we can do to make Building Trades simpler and more hands-on and focus on residential.

To have conversations on what industry wants from our students.

To see some changes in our topics we discuss.

Cookies.

Continue this conversation of Green Technologies.

See more people in the business to network with.

To see more PPI in our agriculture plan.

To have industry reps at the meeting.

Have all previous members present.

To hear about new programs offered in the high schools.

Hear more about architecture.

To see what is going on, on other programs.

To learn more from each other.

Know more info on topic / goals. So I can come more prepared.

Share trans agreements.

To listen to people.

Go out to industry rather than having them come to us.

People from the Big Three to talk and offer to spend time in the classes with teachers.

Have more solutions.

To learn more about what is current in industry.

To see some of these issues resolved for the sake of the students, teachers and the State.

Validation of the test.

To revisit the same issues.

To discuss more and share more thoughts.

More of the same.

More relevant speakers.

Better guest speaker. Someone with education background, not political background.

To see more questions asked about the answers to some of the questions that were asked.

More topics in breakout session. Everything was great !

More input from industry with the limitations placed on educators and education and CTE programs.

Pick 1 solution or group of solutions and drill down.

Smaller breakout sessions.

More information on this topic.

Topics directed / more open to our field. Introduction question somewhat difficult to apply.

To continue important discussion.

Just keep up the good work.

More focus on curriculum, what are classes doing, how are topics being incorporated.

To continue building dialogue.
