Quick Install

May 2022

Quick Install Guide to install IBM iAccess Client Solutions for Windows 7,8,10
AS400 Display Sessions, Printer Sessions, Batch Sessions, & Data Transfers

Macomb Intermediate School District
Help@misd.net

Download and Install IBM iAccess Client Solutions

- Go to ftp://aftp.misd.net/ibmca/ and Save "IBMiAccess_v1r1.zip"
- Extract the IBMiAccess_v1r1.zip to C:\Program Files\
- Open the C:\Program Files\IBMiAccessv1r1\acsbundle.jar
- Click "Yes" on the license Agreement

Configure ISD5 Connection

- Select "Actions", "Management", "System Configurations" from the IBM iAccess Client Solutions window
- Select "New"
- System Name: ISD5.MISD.NET
- Description: ISD5.MISD.NET
- Check the Box for "Use SSL for connection"

Configure Display Session

- Select "5250 Emulator" from the IBM iAccess Client Solutions window
- Login with the Username / Password
- Choose "Communication", then "Configure"
- Change the Screen Size to 27X132 and click "OK"
- Click "Yes" on the Profile change window
- Choose "Edit", "Preferences", "Appearance", "Display"
- On the Cursor Page (Next to Shape) Select "Block" and Click "OK"
- Click "File" and then "Save as"
- Type: DISPLAY and click "Save"

Configure Printer Session

- Choose "5250 Session Manager" from the IBM iAccess Client Solutions Window
- Click on "New Printer Session"
- Session Name: (Example: ISDPRT)
- Destination Address field: ISD5.MISD.NET
- Destination Port: 992
- Workstation ID: (Example: ISDPRT)
- Choose "Printer Setup" on the left, then Select "Other" then "Select Printer"
- Select your Printer from the list and Click "OK"
- Click "OK"
- Now the Printer Session is Connected (Green)
- Click "File" and then "Save as" (Example: ISDPRT)

Configure Batch Session

- Choose "5250 Session Manager" from the IBM iAccess Client Solutions Window
- Click "New Multiple Sessions" on the Session Manager Screen
- Select "DISPLAY.hod", "Printer Session.hod" then Click "Add"
- Click "File" and then "Save as"
- Type: BATCH and click "Save"

Configure File Associations & Shortcuts

- Select “Tools”, then “File Associations” from the IBM iAccess Client Solutions Window
- Select all the Checkboxes and Click “OK”
- Click “OK” on the “The function completed successfully” message
- Browse to: My documents\IBM\iAccessClient\Emulator
- Create Shortcuts to “BATCH.bchx”, “DISPLAY.hod”, and “PRINTER SESSION.HOD”
- Open the BATCH Shortcut
- Check all the check boxes and Select “Allow Access” - On the Windows Firewall Security Alert pop up
- Close all Windows
- Right Click on the “DISPLAY.hod” and Select “Open with…”
- Check the “Use this app for all .hod files” Checkbox, and click “More options”
- Select “Look for another app on this PC”
- Browse to C:\Program Files\IBM\Start_Programs\Windows_i386-32\
- Select acslaunch_win-32.exe and click “Open”

Migrating old Data Transfer Files

- Click on “Data Transfer” from the IBM iAccess Client Solutions Window
- Select “Actions”, then “Data Transfer Migration…”
- Click “Add”
- Browse to the location of your Data Transfers
- “Select” each .dtf file and click “Open”
- You should see all your .dtf files in the window, then Click “OK”
- Click “OK” on the “Migration Complete” message
- Inspect the Migration Results by expanding the “+” Symbol, then Click “OK”
- The new Data Transfer files are now created as .dtfx files
- Delete or Archive the old .dtf files
- Open each Migrated Data Transfer File.
- Note: The “File Location” must already be created before your Start your Transfer.
