Running the Report

Press the “Print” button when all the report options are chosen. You have the ability to name your output report name and save it to a specified file directory. The output file name must have the “.PDF” file name extension entered in the file name (Example: “myfilename.PDF”).

If you press the Cancel button in the Save screen, then the program will name your report as “pdfStudentSum<xxxxx>.PDF” or “pdfTeacherSum<nnnnn>.PDF”, where <nnnnn> is your school building number.

A status bar will appear on the left, displaying the status as the student attendance data or teacher/student attendance data is created. Once completed the file can now be opened from its saved location. It does not automatically print.

The “<Back” button is used to return to the options page to exit the program.

Run Options Page

A summary of the report options selected is printed on the first page of each report.
