

RESEARCHING CLIMATE CHANGE

for Secondary Teachers

February 25, 2010
9:00AM – 3:00PM
Registration Fee: \$50.00
(includes lunch & materials)

Ford Education Center
The Detroit Zoo
8450 West Ten Mile Road
Royal Oak, MI 48067

Current research in the area of global climate change is incredibly fascinating, rich with complexity and offers endless opportunity for students to take a front row seat as the science unfolds before our eyes. In addition to its prominence in the high school Earth Science content expectations, climate change is important for students to understand because of its real world relevance for decades to come. This workshop will familiarize teachers with the major areas for climate change science and offer experience with engaging and effective instructional approaches they can use with students.
