What is the Parent Dashboard for School Transparency?

➢ Parent-friendly transparency tool

➢ Shows the performance of every public school in Michigan

➢ A new direction in accountability

What is the Dashboard all about?

➢ Every Student
   Succeeds Act (ESSA)
   opportunity (2015)

➢ Requested by parents
   and others

➢ State Board of
   Education policy (2017)

State Board of Education Policy on Michigan's Transparency Dashboard

● purpose of this statement is to outline the desired metrics for Michigan's new transpare
ahboard, as well as identify areas of additional work and a development timeline. Once
proved/adopted by the State Board of Education (SBE), the Michigan Department of Educ
ll work from this document to begin the development cycles.

Is important to note the following:
• This dashboard is a school-level dashboard.
• The primary and most important audience for this dashboard are parents.
• This document should be considered a living document, as development of durable
  transparency dashboard is iterative in nature.
• The MDE intends to do additional surveys of parents and other stakeholders, as well
  group and usability testing. In this process, we may identify necessary changes.
• This is an aspirational plan. We do not currently have all the data and information w
  eventually want (this is noted in the plan), but we will work toward collecting those

Student Demographics:
Calculated to identify schools with the most similar demographics based on four characteristics:.
1. the number of students enrolled in a school,
2. the student-teacher ratio,
3. the percentage of students receiving free or reduced lunch,
4. and the amount of money the school spends per student.

NOTE: In order to be considered a peer, the following needs to be true: there must be at least one authorized grade (in EEM) overlap (if a junior high has authorized grades 6-9, it's going to be a peer for any high school that has grade 9 authorized), the peer must have "current" headcount data (basically needs to be an open school educating students) and its parent district must have submitted instructional expenditures. The state is working on defining "current", but it was as up to date when we launched in late December 2018.
